Redirect all /subfolder (external) RewriteRule ^(.*)$ /subfolder/$1 [R=301,L] Now, I don't think this is a good solution, as it  
will be hard to maintain if I update any of the code. Can someone tell me if I'm doing something really wrong? What is the  
correct approach? Thank you A: This is probably a better solution, as it will still redirect everything. RewriteRule ^(.*)$ /$1
